

eSolutions

Business Reference

for Sb Accounting & Consulting

”

We at eSolutions EOOD are pleased to provide this reference for SB Accounting & Consulting. As a Fintech company employing approximately 80 professionals, we highly value streamlined operations and reliable partnerships – qualities we have found in abundance through our collaboration with Sb.

From the very first contact, the implementation process took approximately three weeks, culminating in a smooth and timely launch of the service. Throughout this period, the SB team was consistently supportive and responsive, guiding us through each phase. Their hands-on approach ensured that all technical and operational steps were handled with clarity and professionalism.

The implementation of the electronic labour files has made a significant impact on our HR operations. This system has improved efficiency, reduced administrative overhead, and enabled quicker and easier communication with colleagues when document signing is required. As a result, our HR department has been able to focus more on strategic initiatives, rather than manual document handling.

Moreover, the employee adoption of the system has been entirely positive. The user-friendly nature of the platform and the reliability of the tools provided have made it easy for all colleagues to transition to digital file management.

In summary, we highly recommend SB Accounting as a professional, dependable, and forward-thinking partner. Their commitment to service quality and digital transformation aligns perfectly with the needs of modern organizations.

Best regards,
