

Business Reference

for Sb Accounting & Consulting

”

The implementation of the E-signatures and usage of Web tools system at Scalefocus started in June 2022. The whole process – from the first meetings till the first signed document – took about 2 months. We didn't have problems during the implementation of the system. The process went smoothly, the colleagues from Sb Accounting & Consulting were – and still are – very responsive and competent.

Our team uses the Web tools system on a daily basis and 90% of the current staff signs electronically. All of the labor-related documents are signed in the system electronically. All new employees start with an electronic labor dossier. The whole set of termination-related documents are also signed electronically.

Documents signed through the system include: additional agreements, orders, qualification agreements, the full set of documents for the newcomers, various declarations. Considering the fact that at Scalefocus we have a hybrid work model and our employees do not typically attend the office premises every day, this way of work is very convenient. We have reduced the amount of paper used, and most of the document flow is now digital. The system also supports bulk import of documents, which is excellent for mass changes of the employment records. Last but not least, it allows the generation of various reports which help us for different purposes.

Based on our experience, we would recommend the Web tools system to all colleagues who want to keep up with the new technologies.

Best regards,
