

Business Reference

for Sb Accounting & Consulting

SSP Bulgaria has been working with Sb since 2024. Sb provides us with a broad range of accounting and related services, including monthly bookkeeping and reporting, statutory and tax reporting, yearend closing and preparation of the annual financial statements, as well as payroll and HR administration support.

The team has also supported the implementation and ongoing use of our Business Central accounting processes and assisted us with local compliance matters, including VAT and other statutory reporting requirements.

Our overall experience with the quality of Sb's work has been positive. The team has supported SSP Bulgaria from the initial implementation stage through the development of our ongoing operations and has continued to assist with month-end processes, annual reporting and new compliance requirements as they arise. We have found the team professional, dependable and responsive, with regular communication and a willingness to coordinate with SSP and our other service providers when issues need to be resolved.

We particularly appreciate the team's practical support and prompt responses on accounting and compliance matters, as well as its ability to identify when specialist advice is appropriate. Based on our experience to date, we regard Sb as a reliable local accounting and compliance partner in Bulgaria.

Overall, our experience with Sb Accounting & Consulting has been positive, and I would be comfortable recommending the company to other businesses looking for a professional accounting and compliance partner in Bulgaria.

Best regards,
